

Homeopathy

Dubbed the original alternative medicine, homeopathy uses the principle of ‘like cures like’ to stimulate the body’s innate healing ability. **A homeopathic remedy is simply a dilution of one or several plant, mineral, or animal substances that triggers an energetic signal and promotes healing.**

Homeopathy success is fueled by several factors:

- **Homeopathy is extremely effective.** When the correct remedy is taken, results can be rapid, complete and permanent.
- **Homeopathy is completely safe.** Even babies and pregnant women can use Homeopathy without the danger of side effects. Homeopathic remedies can also be taken alongside other medication without producing unwanted side effects.
- **Homeopathy is natural.** Homeopathic remedies are normally based on natural ingredients.
- **Homeopathy works in harmony with your immune system,** unlike some conventional medicines which suppress the immune system. For example, cough medicines suppress the cough reflex, which is your body’s attempt to clear the lungs.
- **Homeopathic remedies are not addictive** - once relief is felt, you should stop taking them. If no relief is felt, you are probably taking the wrong homeopathic remedy.
- **Homeopathy is holistic.** It treats all the symptoms as one, which in practical terms means that it addresses the cause, not the symptoms. This often means that symptoms tackled with Homeopathy do not recur.
